

BRIAN GOLDSTEIN

Software Engineer

SKILLS

LANGUAGES

Python, JavaScript, HTML, CSS

LIBRARIES & FRAMEWORKS

ReactJS, OpenAI, ROS2, Pandas, NumPy, SpaCy, Streamlit

SOFT SKILLS

Problem-solving, Communication, Teamwork

EDUCATION

B.S IN COMPUTER SCIENCE, CONCENTRATION IN AI AND ROBOTICS

Aug 2021 - May 2025

University of North Carolina at Charlotte

Charlotte, NC

Dean's list Spring 2022

PROJECTS

BESTSCRAPE - FULL STACK WEB SCRAPING SERVICE

Flask, Selenium, MongoDB, ReactJS, ChartJS

- ♦ Developed a full-stack web service that automates BestBuy product scraping using keyword-based searches (e.g., "Laptops", "Phones", "TVs")
- ♦ Data retrieval using MongoDB's PyMongo and Flask to display product information and prices straight to the user
- ♦ Utilized Chart.JS to create price trend charts for each product

AI-POWERED RECIPE GENERATOR

ReactJS | JavaScript | OpenAI | Python | Flask

- ♦ Developed a Full-Stack React Application with AI-pipeline backend
- ♦ Efficiently creates a recipe dependent on user-input fields:
 - ♦ Type of dish (salty, sweet, savory, etc.)
 - ♦ Time of Day (Breakfast, Lunch, or Dinner)
 - ♦ Allergies present in the user
- ♦ Implemented error-handling to ensure seamless experience
- ♦ Utilized Web API Storage to ensure data-recovery upon leaving the page

FACIAL RECOGNITION TIMECARD SYSTEM

Facial Recognition | Streamlit | Python | OpenCV | Database Management | SQLite

- ♦ Developed a Full-Stack Streamlit-based timecard system with login/signup authentication.
- ♦ Integrated facial recognition for secure clock-in/out verification using OpenCV.
- ♦ Designed a schedule management feature supporting CSV uploads and manual input.
- ♦ Built a user database to store names, hashed passwords, and facial images.
- ♦ Built a shifts database to store the names, shift date, start time, and end time.
- ♦ Ensured data security by verifying user identity before logging attendance.
